WITHOUT THE HASSLE
of exchanging a needle

*VersaCross™ RF Wire can be used, without exchanges, as a guidewire, as a transseptal puncture device or as an exchange rail for delivering therapy sheaths.

INSTANTLY SECURE ACCESS

RF Puncture Technology allows crossing even in challenging anatomy. Instantly probe and anchor into pulmonary vein without exchanges.

TRUform™
SHAPEABLE TECHNOLOGY

Shapeable dilator with true-to-form curve retention

DELIVER CONSISTENT CONTACT FORCE†

Retain your curve and support consistent contact force† with the **VersaCross™** Steerable Sheath. Consistent contact force of ablation catheters provides better therapeutic results.[1]

TruGlide™
RESPONSIVE HANDLING

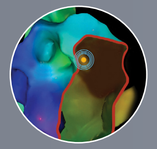

Responsive, smooth, high-precision steering to confidently position your curve

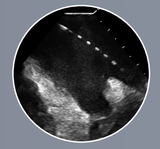

†Assessed by repeated bidirectional curving up to 100 cycles while tracing the curve radius at each step (p<0.001) and by full bidirectional articulation to maximal extension up to 10 times to achieve mechanical fatigue (p=0.007). Comparisons done using 5 SureFlex™ and 3 competitor sheaths, with needle and dilator inside sheath. Based on bench testing conducted using SureFlex™ Steerable Guiding Sheath, which has identical steering mechanisms to VersaCross™ Steerable Sheath. Bench testing or pre-clinical study results may not necessarily be indicative of clinical performance. The testing was performed by or on behalf of Boston Scientific. Data on file.
